

PLATFORM OVERVIEW

INCIDENT RESPONSE IS CHAOS

Constant breaches have led to intense scrutiny and a global tidal wave of regulations demanding rapid notifications and steep penalties. Incident response processes are manual and increasingly complicated, taking key personnel away from mission-critical work during a cyber incident. In addition to security teams being understaffed and overwhelmed, one of the biggest challenges is cross-functional alignment and confusion between business teams during an incident.

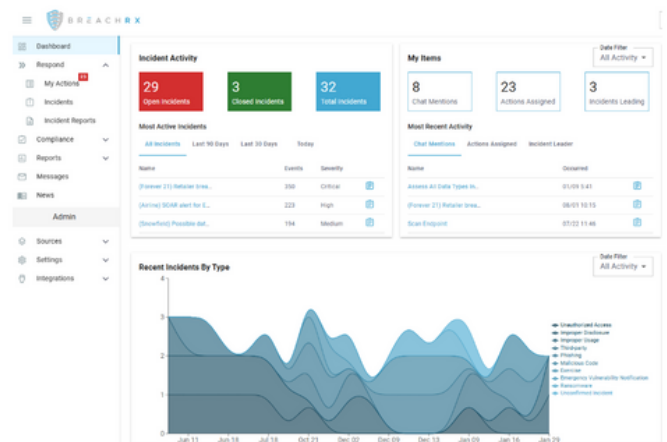

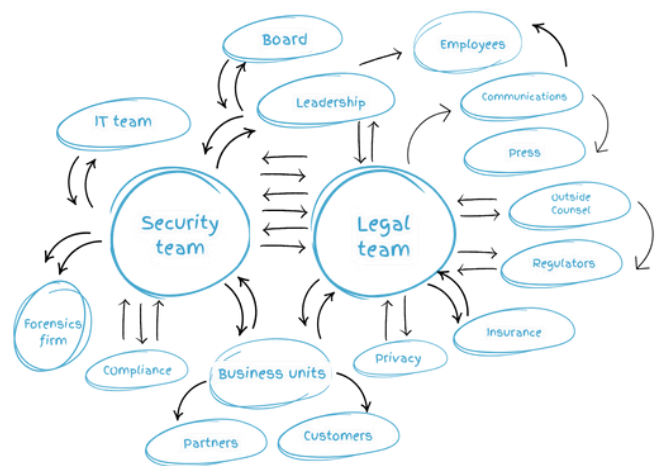

A NEW APPROACH TO INCIDENT RESPONSE

BreachRx is a next-generation incident response, management, and reporting platform that replaces chaotic and manual processes with automation and collaboration for cybersecurity, legal, compliance, privacy, and other business teams to manage incidents, plans, obligations, and compliance requirements.

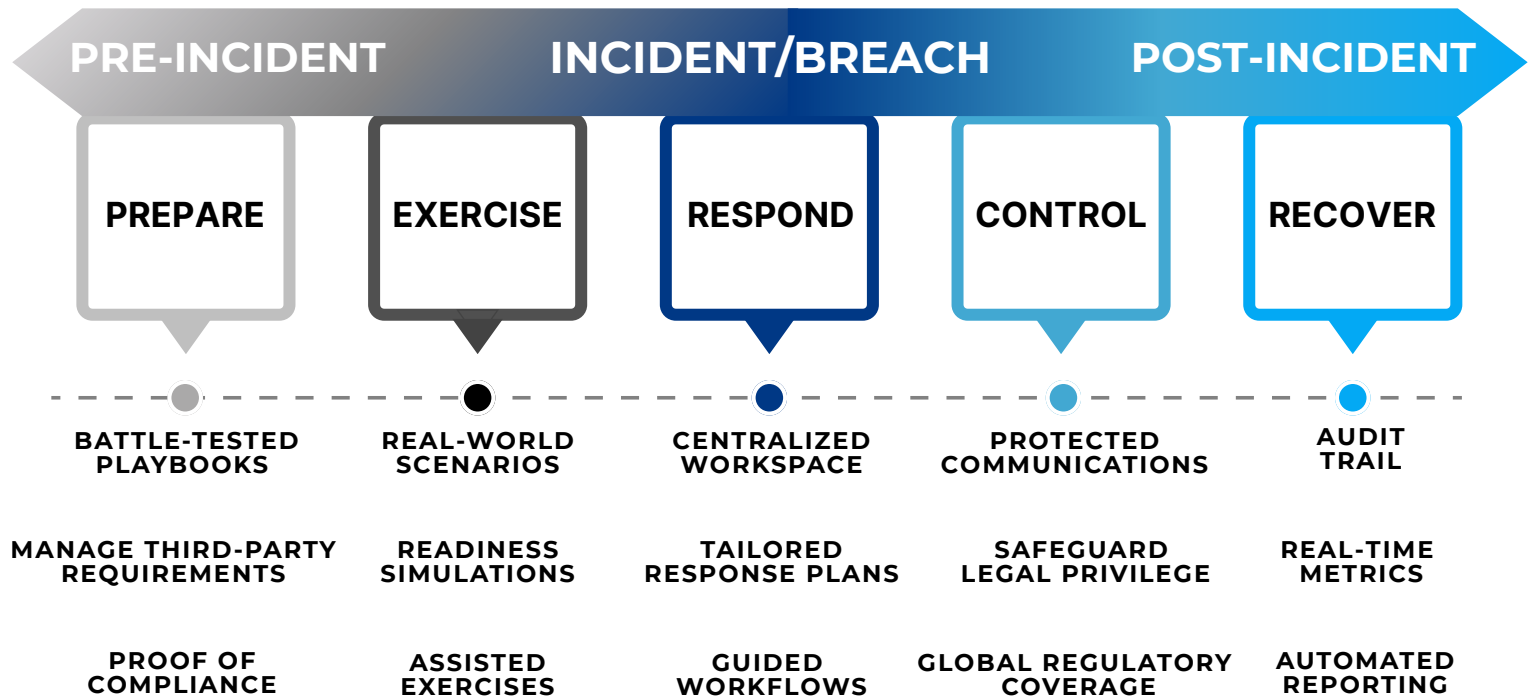

OUR VALUE

- 1 ENABLE COLLABORATION TO REDUCE CHAOS**
Orchestrate real-time, cross-functional collaboration across business teams with clear responsibilities and less chaos.
- 2 IMPROVE EFFICIENCY & REDUCE MANUAL WORK**
Operationalize your incident response program through automated task management with instructions and deadlines.
- 3 INCREASE READINESS & RESPOND FASTER**
Automated simulations and exercises provide proactive preparation to improve response timelines and incident resilience.
- 4 ENSURE COMPLIANCE & REDUCE RISK**
Guarantee compliance, shorten regulatory response timelines, and mitigate the risk of class-action, fines, and lawsuits.
- 5 MINIMIZE BUSINESS IMPACT**
Safeguard business operations and minimize disruptions and downtime while reducing the long-tail costs of incidents.

FROM CHAOS TO CONTROL

KEY FEATURES

LEADING TEAMS RELY ON BREACHRX

We needed a holistic case management platform that's repeatable, auditable and defensible. The BreachRx platform captures reasoning why we did or did not do something. Engaging external stakeholders is no longer challenging.

CISO | Leading Airline

We don't want to rely on hearsay, recollection, and a smattering of emails when we could have a program based on rigor and automation.

Director of Cybersecurity and Compliance | Leading Hospitality Chain

ABOUT BREACHRX

BreachRx is the first scalable and dynamic SaaS platform for intelligent incident response. Leading airlines, financial, pharmaceutical, restaurant, retail, telecom organizations choose BreachRx to provide operational resilience across the entire enterprise during a cyber crisis. The patented technology brings order to the chaos before, during, and after incidents by automatically generating tailored incident response plans and providing targeted guidance to relevant stakeholders through every step of the process. Integrated privileged communication channels and audit trails ensure compliance with rapidly evolving standards and proactively protect CISOs and executive leadership from personal liability.
