BreachRx Cyber RegScout™

A DYNAMIC REGULATORY ENVIRONMENT DEMANDS COMPREHENSIVE ANALYSIS

Data breaches are an increasingly pervasive problem companies face today. Regulators have responded by creating a complex global web of 180+ cybersecurity and privacy regulations—many with compressed timelines for incident reporting and steep penalties for blowing strict deadlines.

Security, compliance, and legal teams typically rely on massive spreadsheets and lengthy regulation summaries to determine which apply at any moment and for any given incident. Keeping these current as laws change every year can be a full-time job and wastes valuable time better spent on business priorities. BreachRx Cyber RegScout™ eliminates this burden with the industry's only current and comprehensive research library of regulations. Combining human expertise, artificial intelligence, and automation, security and compliance teams are empowered to reduce risk.

SHORT DEADLINES REQUIRE INTELLIGENCE & AUTOMATION

When the inevitable data breach occurs, manually reviewing 50 US state regulations or 180+ global regulations is not tenable when notification decisions need to be made within hours. BreachRx Cyber RegScout™ reduces this regulatory analysis from days to seconds. Your company will know immediately 1) which regulations apply, 2) the most strict jurisdictions, 3) how long you have to notify, and 4) the methods and formats for each notification. By assessing your obligations instantly, you minimize risk, reduce costs, and save valuable time when responding to an incident.

“With Cyber RegScout, companies can proactively mitigate a growing risk. The future of work demands solutions like this that combine automation and expertise.”
- Alexandra Ross, Senior Director, Senior Data Protection, Use & Ethics Counsel at Autodesk

HOW IT WORKS

- 1) **Describe Your Data** - Whether you're proactively assessing breach risk or facing an active incident, you can enter information about the relevant data your company holds.
- 2) **Select Incident Details** - As awareness of what occurred develops, easily select the type of incident and add any additional details at any point as they are discovered.
- 3) **Regulations Automatically Matched** - Once the data attributes and incident details are entered or updated, BreachRx Cyber RegScout™ automatically identifies the regulations that apply to the given scenario and provides automation to curate and prioritize them further.
- 4) **Know Exactly What To Do** - Explore regulatory details, including notification requirements and gain cutting-edge insights into each regulator's strictness and recent actions.

WHY CUSTOMERS LOVE BREACHRX CYBER REGSCOUT™

Instead of a lengthy manual process prone to user error involving exhaustive spreadsheets and dense regulation summaries, customers leverage BreachRx to research regulations, instantly run a regulatory analysis, gain actionable insights, and know how to respond to incidents with ease. Customers unanimously express that Cyber RegScout is a far superior experience to their past approach, saving hundreds of hours of inefficient time, optimizing incident communication and coordination, and reducing risk by ensuring the best response possible to incidents, large or small.

<u>THE BREACHRX DIFFERENCE</u>	<u>Cyber RegScout™</u>	<u>Law Firm Summaries</u>
Regulations	Up to Worldwide	US Only
Frequency of Regulation Updates	Continuous	Once a Year
Conducting Legal Analysis	Streamlined	Manual
Map Navigation	Dynamic & Global	Static & US Only
Filtering & Sorting	✓	X
Exceptions & Exemptions	✓	Limited
Notification Requirements	✓	Limited
Notification Triggers	✓	Limited
Comprehensive Risk Score	✓	X
Recent Enforcement Actions	✓	X

KEY BENEFITS

Less Outside Counsel	Reduce the need for outside counsel, especially for routine incidents.
Save Time	Streamline your workflow by eliminating the need to manually review every regulation one by one or sift through dense spreadsheets.
Reduce Costs	Make teams more efficient and reduce the need to hire more headcount.
Assess Liability	Gain immediate insights into the potential impact of new data collection initiatives, as well as the ramifications of data in incidents or breaches.
Mitigate Risk	Safeguard against overlooking a regulation or missing a deadline with comprehensive regulatory coverage.
Accelerate Action	Empower your team with automated regulatory analysis to quickly execute required reporting and get back to business as usual.

ABOUT BREACHRX

BreachRx is known for its leading automated incident reporting and response platform used by security and legal leaders to overcome one of their biggest challenges—reducing cybersecurity and privacy incident risks. With the addition of Cyber RegScout™, BreachRx is the only company that enables teams to cover the full spectrum of incident response requirements in the market today.
