

Enterprise Incident Response for the AI Era

Rex Platform™, powered by Rex AI®, transforms organization-wide incident chaos into a coordinated, cross-functional response.

Offensive AI is Accelerating Attacks

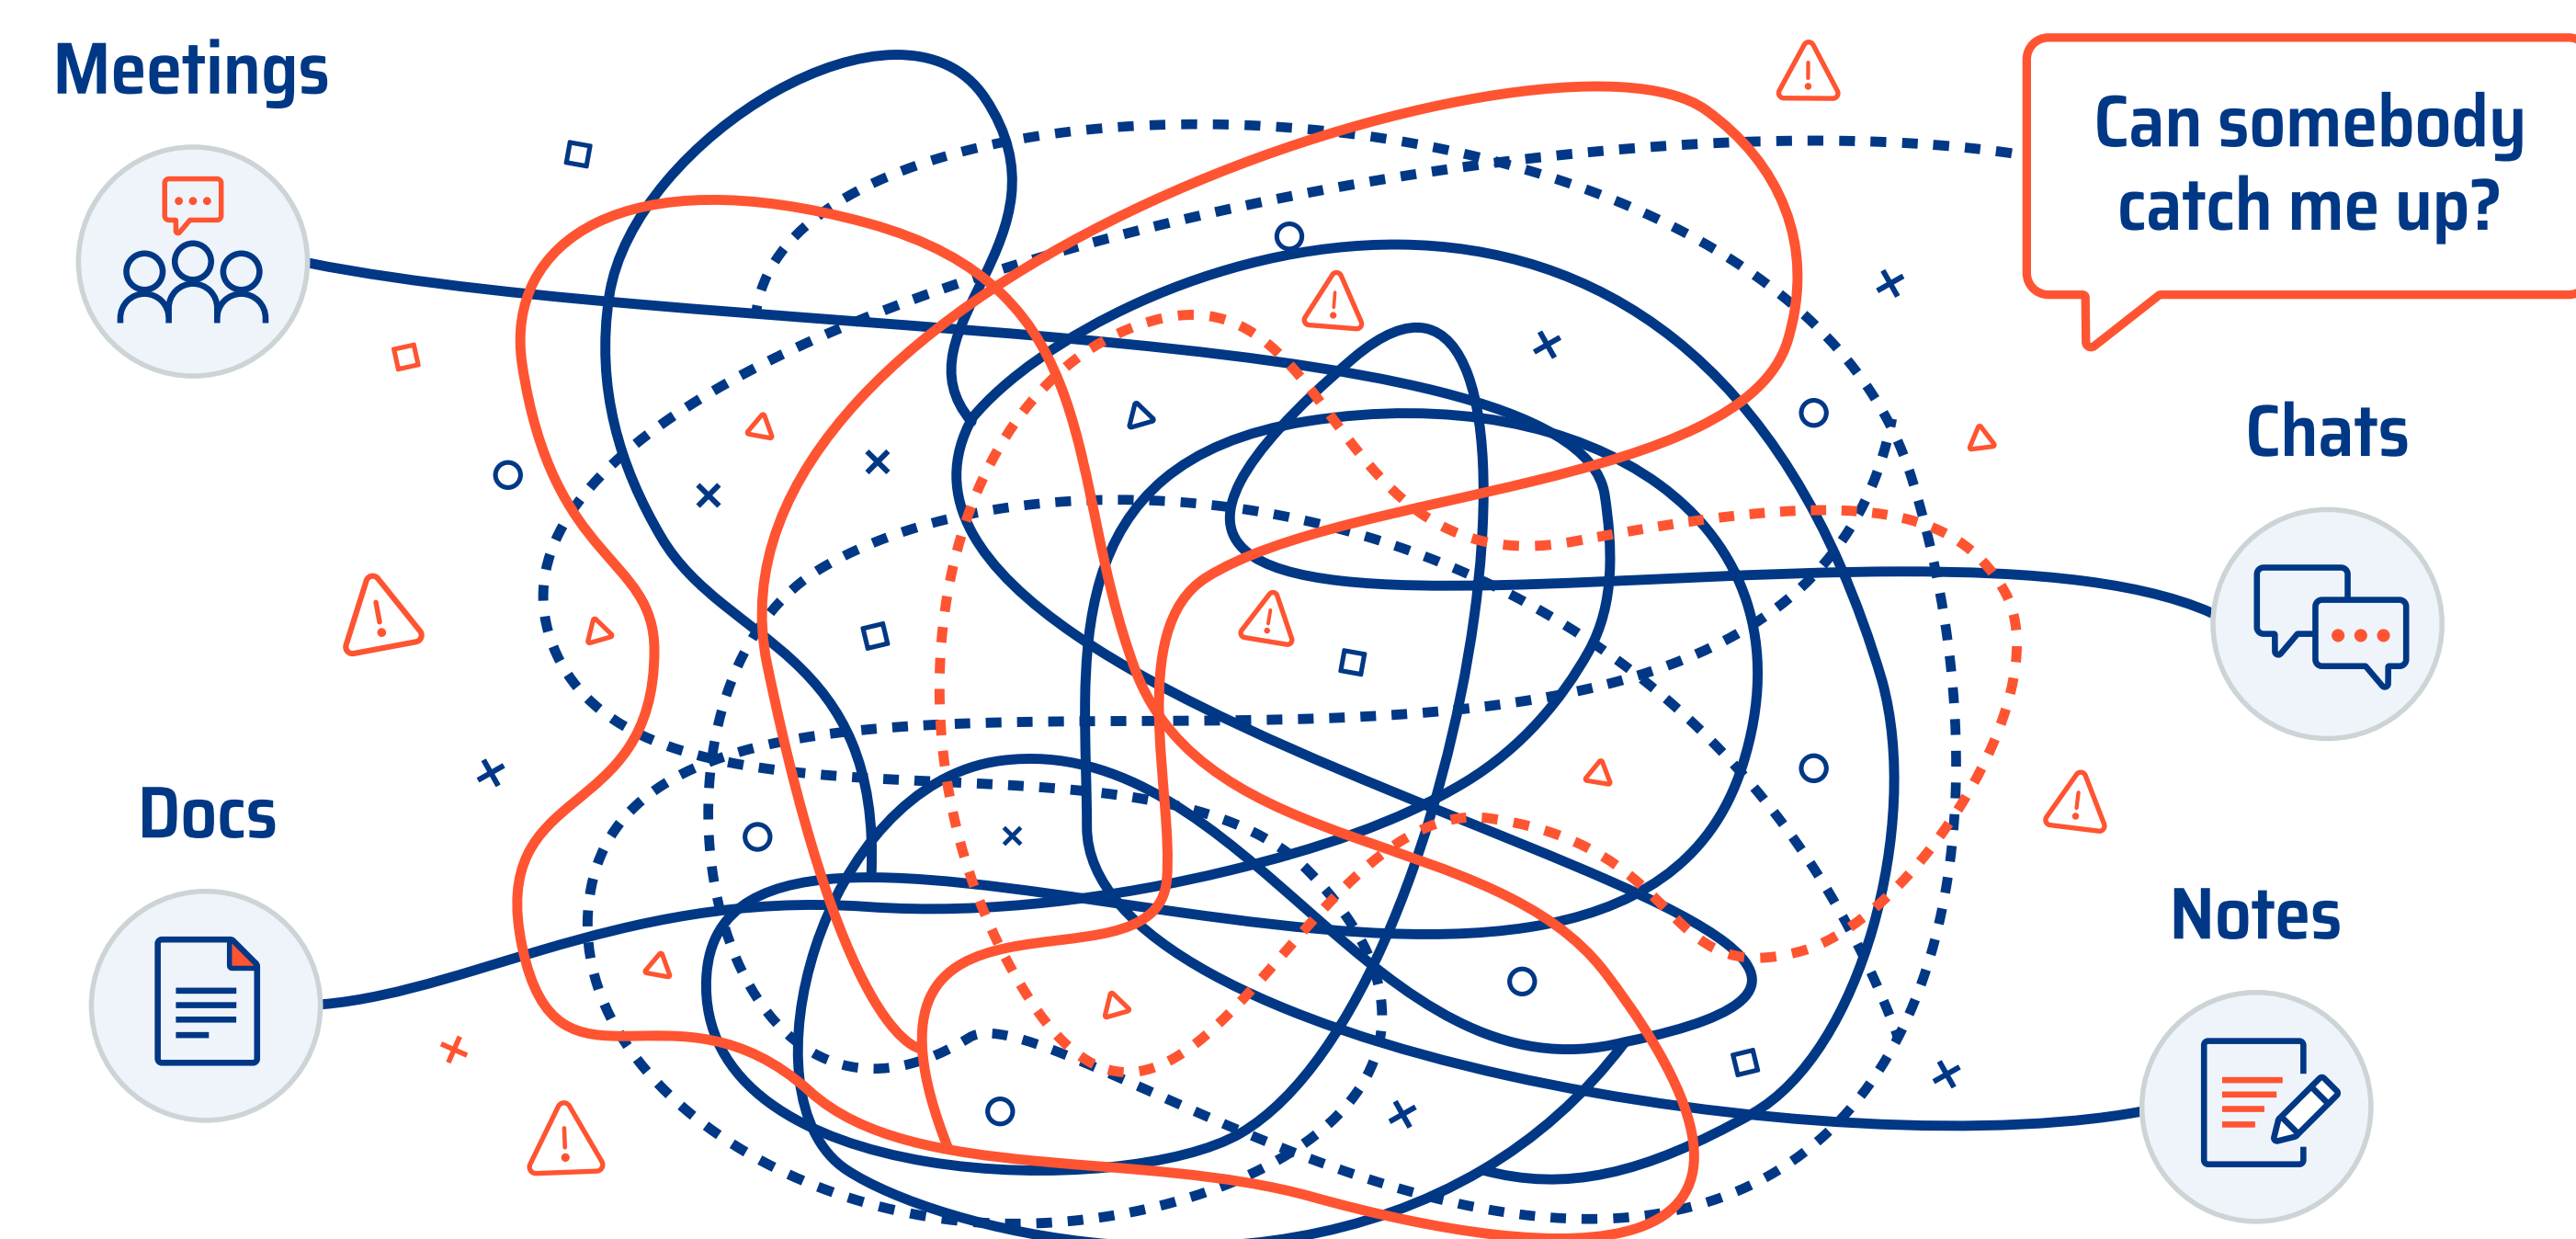

Cyber incidents are now easier to launch, more sophisticated, and can result in multiple concurrent attacks.

-  **Faster**
-  **Easier to Launch**
-  **More Scalable**
-  **Concurrent**

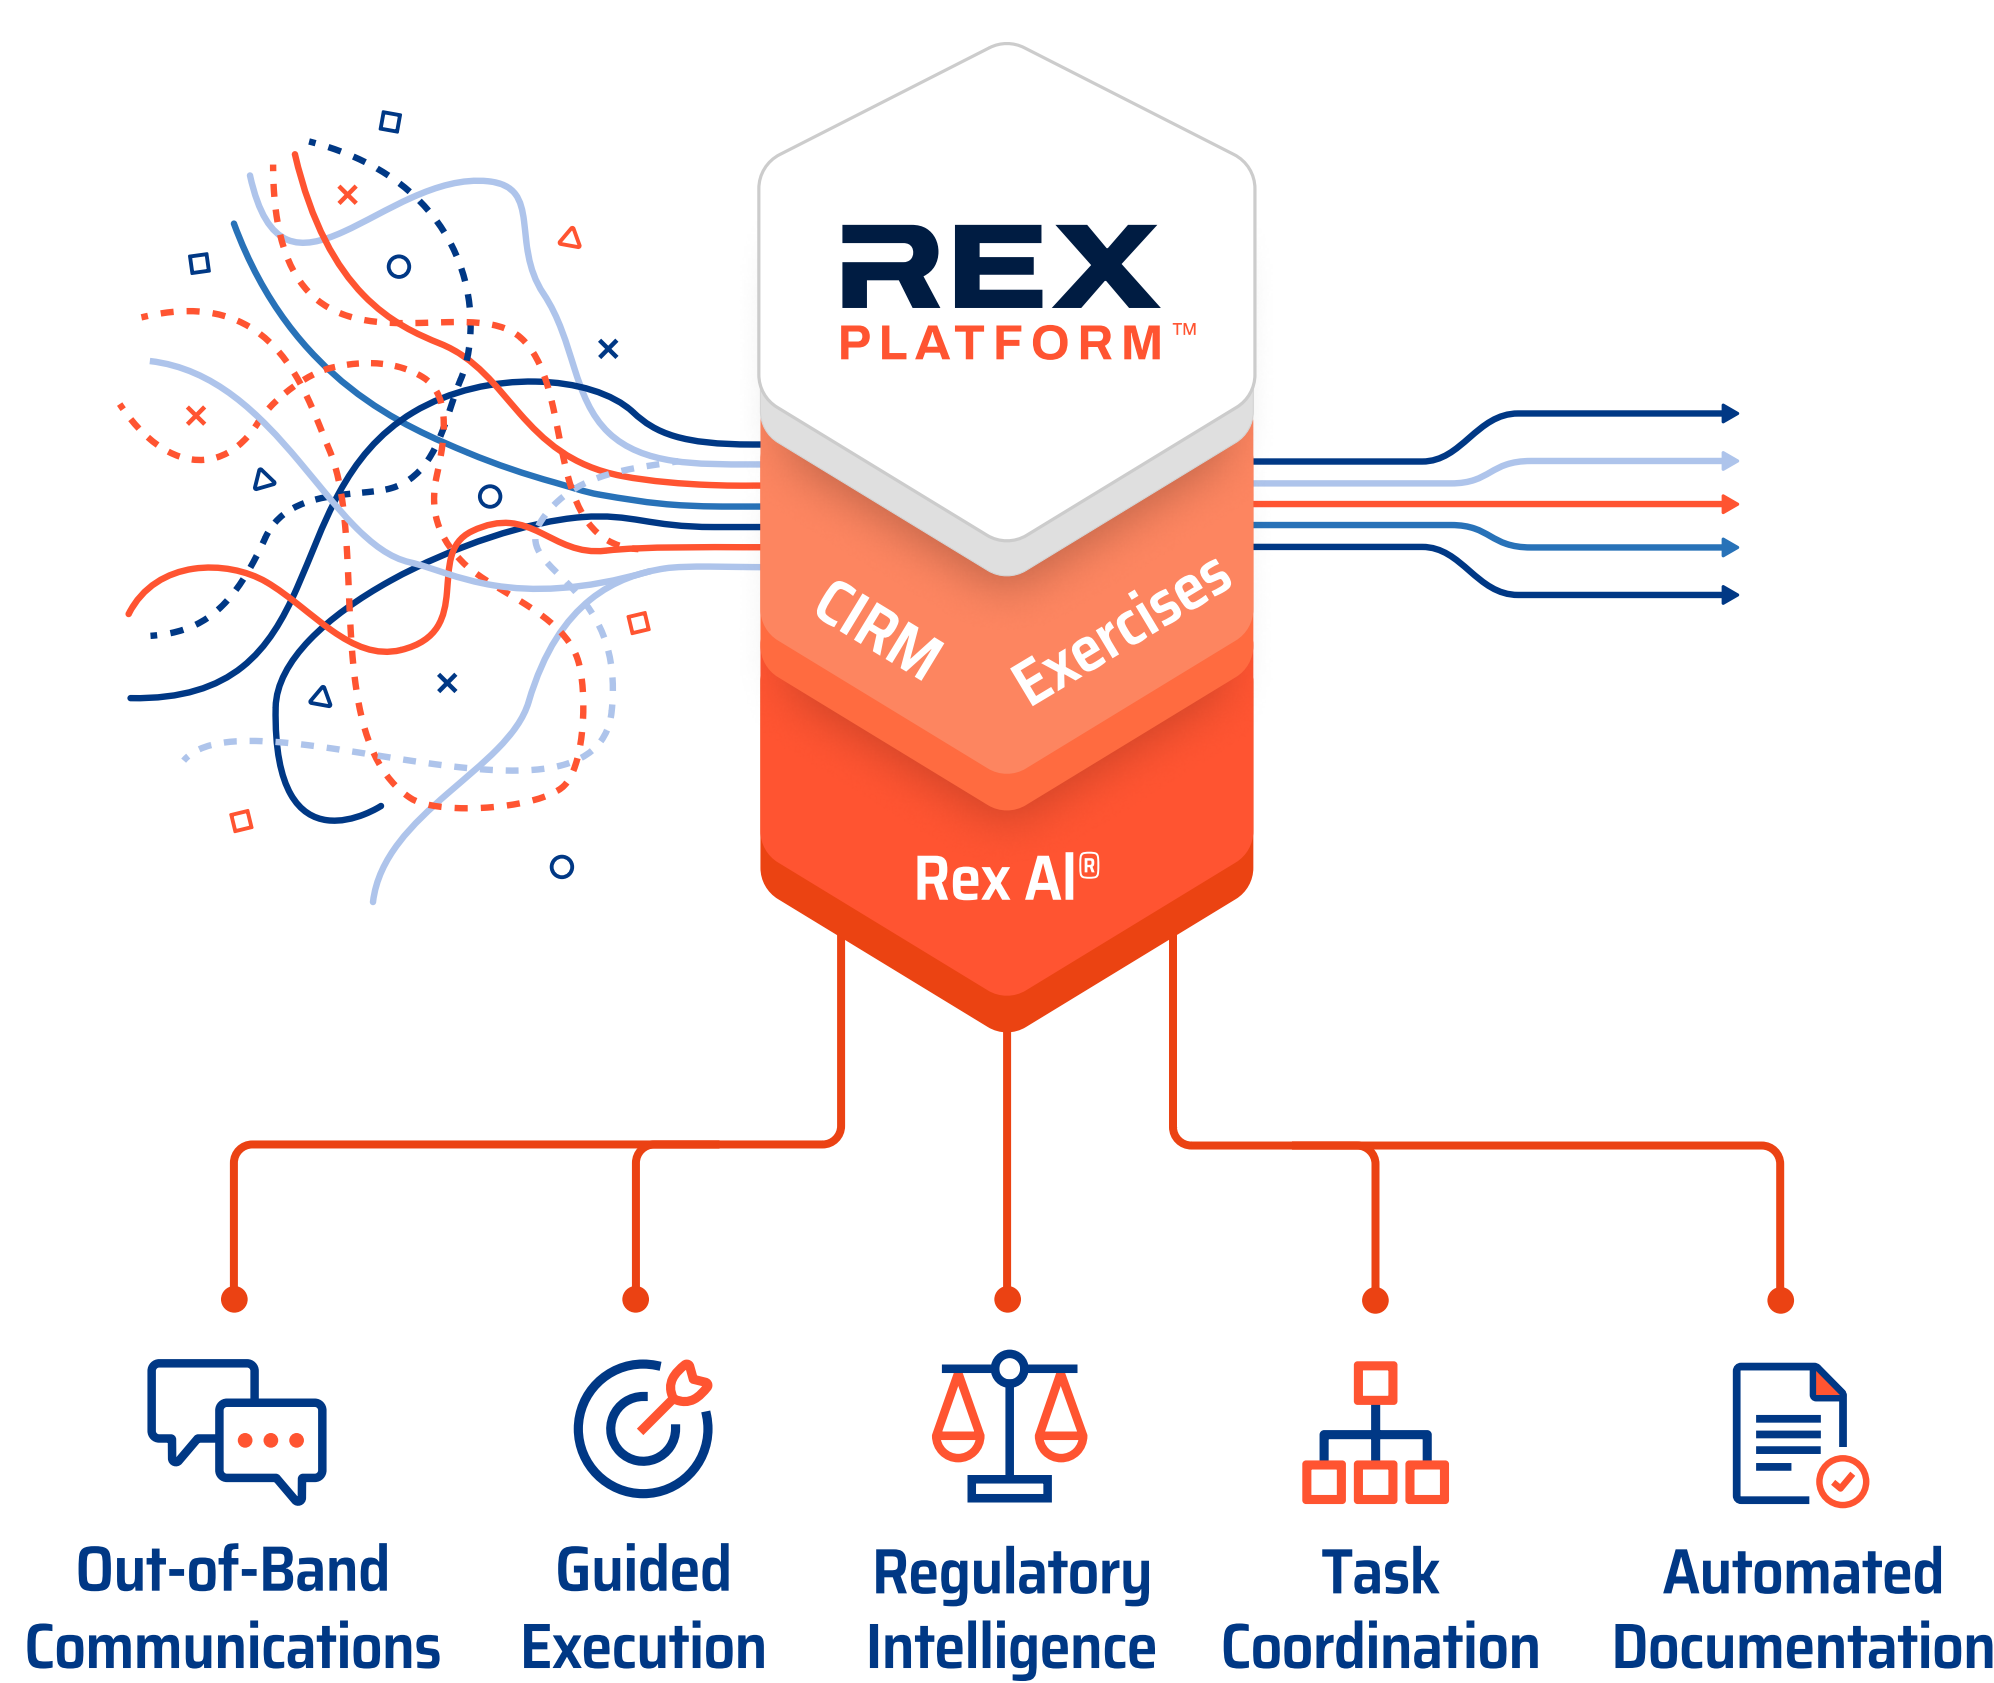

Organizations are Overwhelmed by Chaos

Limited IT team bandwidth, compressed reporting timelines, growing personal liability, and need for coordination inside and outside the organization make manual IR response processes insufficient.

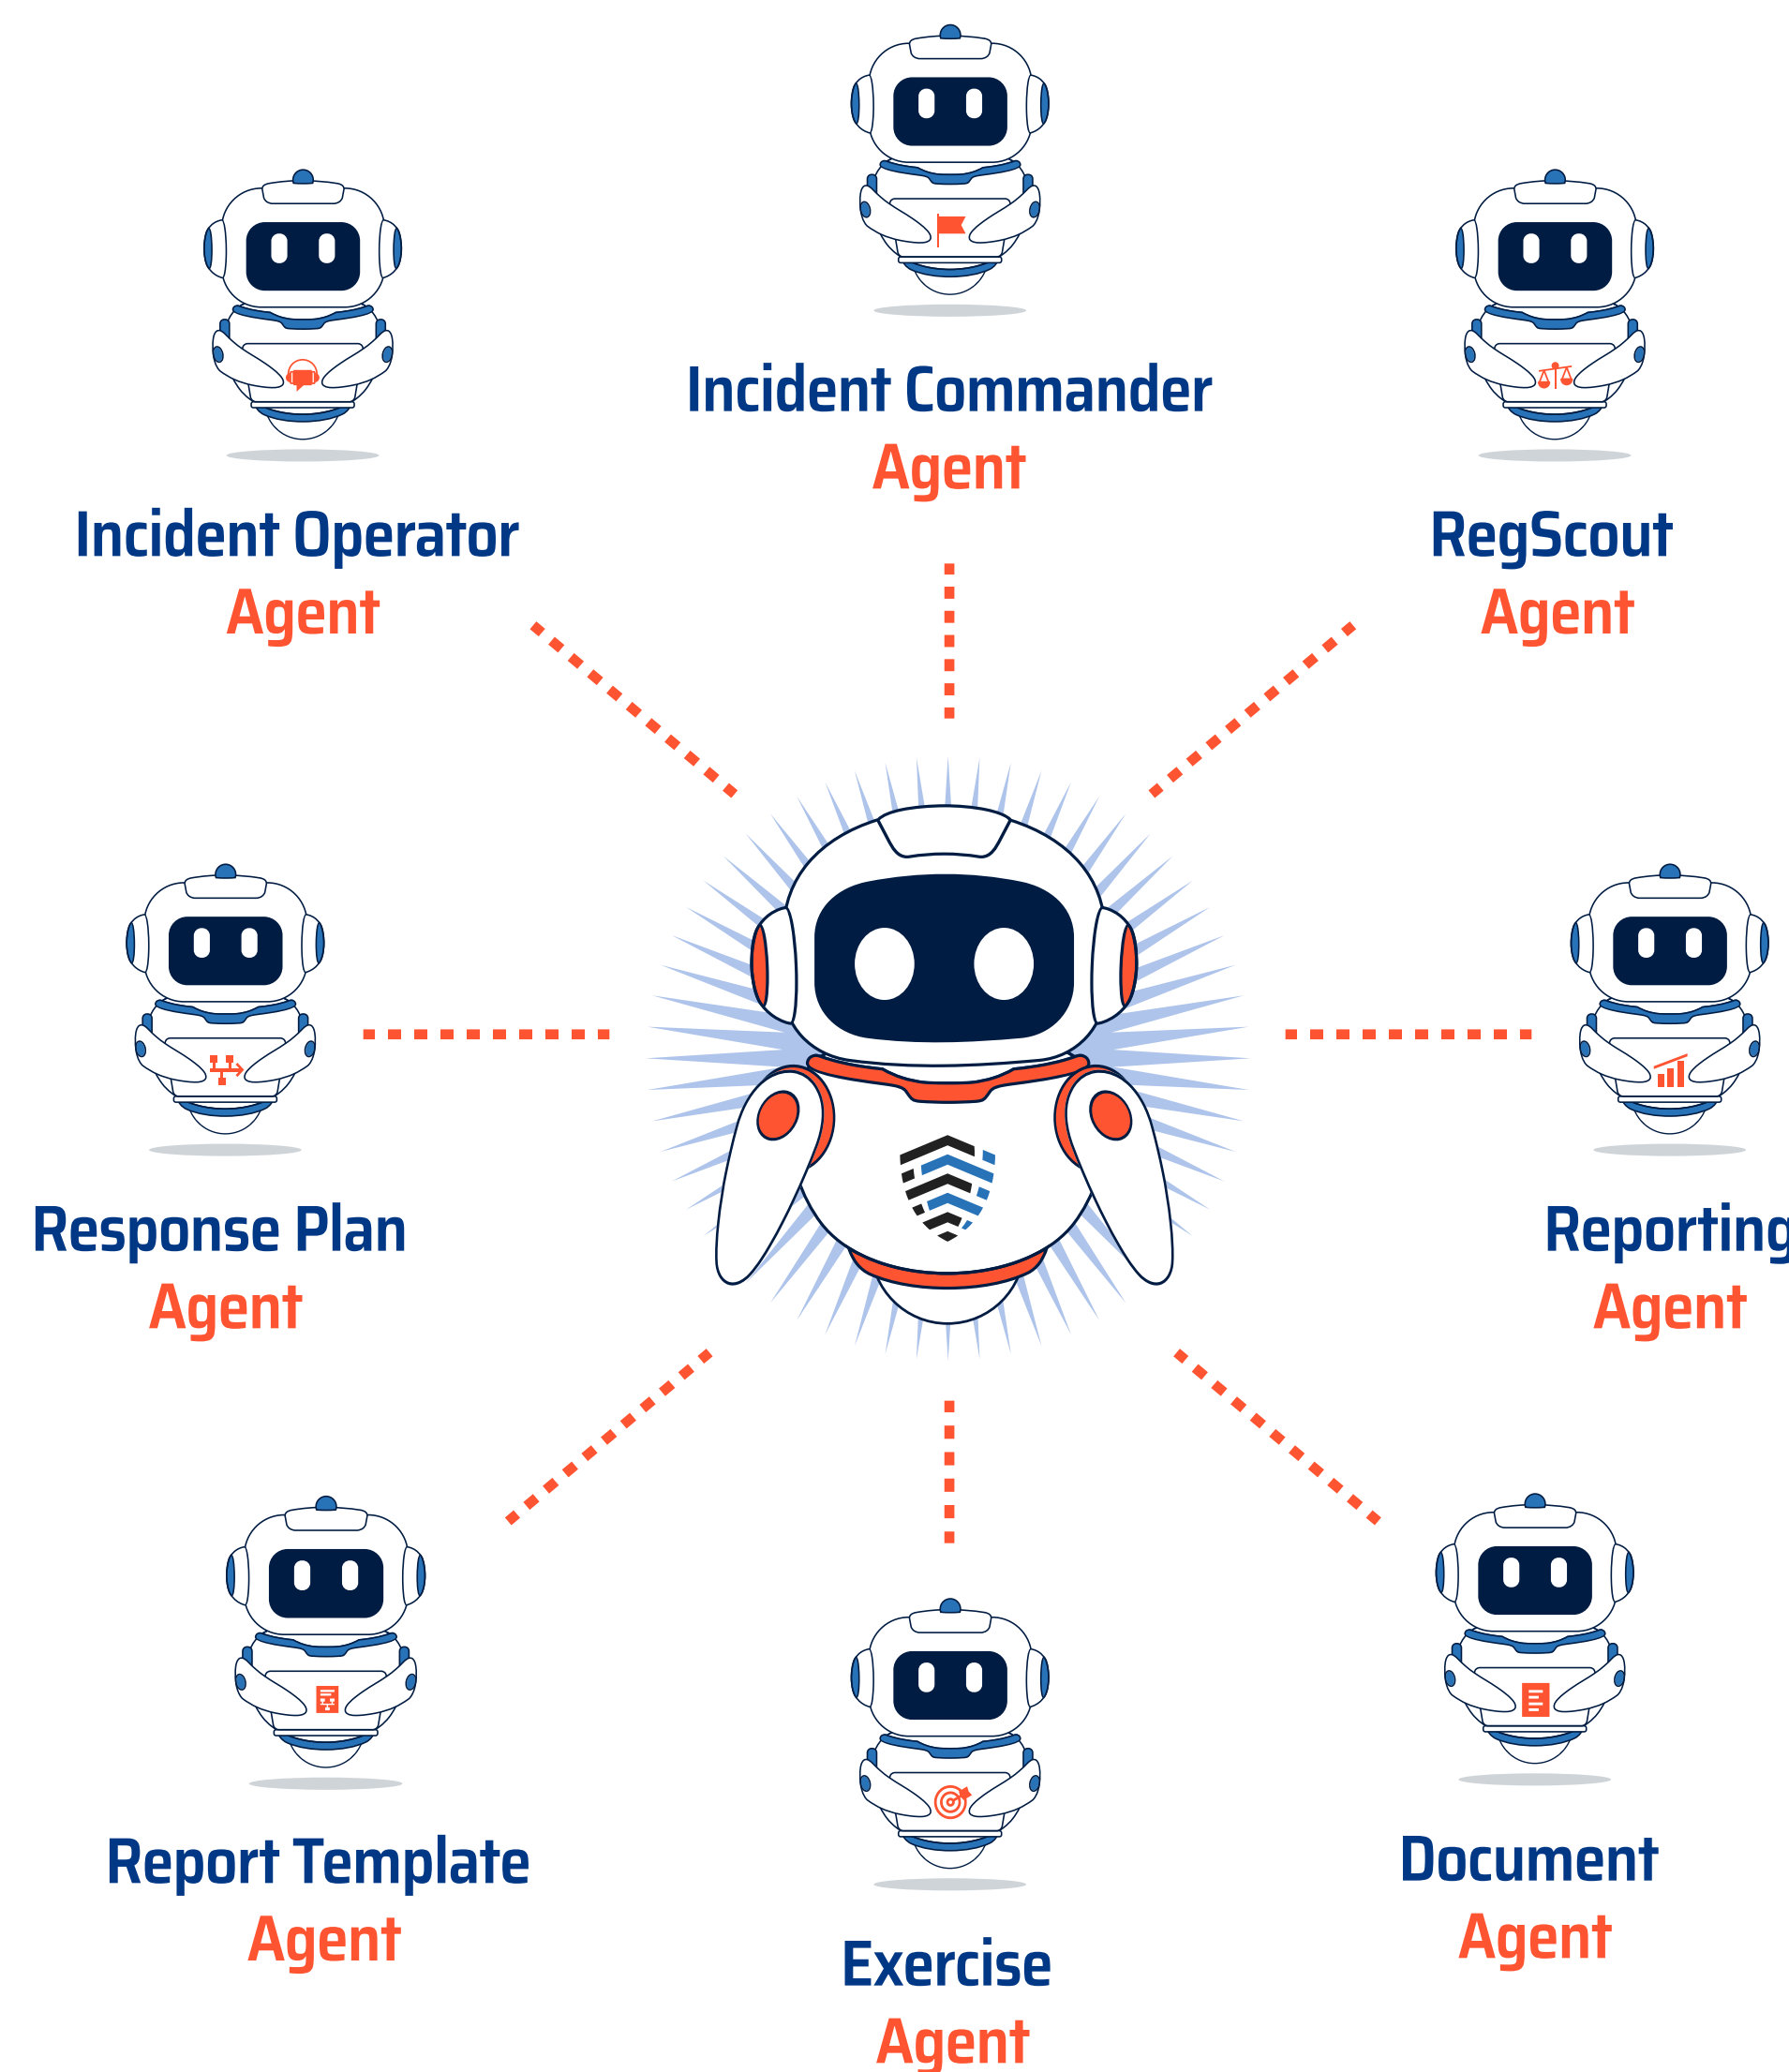

Enterprise Incident Response is Critical

A unified AI-powered platform that brings order to chaos and fights offensive AI by coordinating an enterprise-wide governed response beyond just the IT team.

Rex AI Maestro Automates Coordination

Maestro coordinates dedicated agents across the incident response lifecycle while keeping you in control.

Rex AI Lets You Train Like You Fight

Rehearse response scenarios in the same dynamic environment as you respond to real incidents, eliminating static playbooks.

Incidents are inevitable. Chaos is optional.

Rex Platform empowers cross-functional teams to respond with coordination, confidence, and clarity. Out-of-band communications are secure. Every action is documented in real-time.
